PROF JOHANNA WANKA VISITS THE HZI

FEDERAL MINISTER FOR EDUCATION AND RESEARCH DISCUSSED THE FUTURE OF INFECTION RESEARCH WITH HZI SCIENTISTS

On 12 September the Federal Minister for Education and Research, Prof Johanna Wanka, visited the Helmholtz Centre for Infection Research (HZI).

Prof Johanna Wanka also visited the S3 laboratory during her stay at the HZI

During her stay scientists from the centre presented the main research areas the HZI and its partners work in.

Furthermore, the Federal Minister had the opportunity to visit the S3 laboratory on the campus. After the presentations and the guided tour through the laboratory Prof Dr Wanka and the scientists got together once more to go into more detail about current research questions and the future of infection research.

The Helmholtz Centre for Infection Research (HZI):

The Helmholtz Centre for Infection Research contributes to the achievement of the goals of the Helmholtz Association of German Research Centres and to the successful implementation of the research strategy of the German Federal Government. The goal is to meet the challenges in infection research and make a contribution to public health with new strategies for the prevention and therapy of infectious diseases.
