Process_H5N1

Subprocess_InvestigateContact

This Process is triggered by two events:

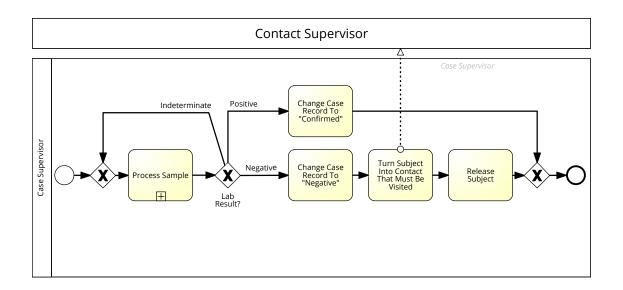

1. An individual is exposed to sick poultry with confirmed H5N1 infection ("exposed")

2. An individual had contact with a person with confirmed H5N1 infection ("contact")

3. Both events lead to this very same procedure and the individuals under investigations are called "contacts" Check Contact List Of All Contacts For Suspected Case Contact Not Seen For 48h Overall Conta List
